

Quality Policy

Algorithm is committed to consistently manufacture, promote and sell pharmaceutical products that are fit for their intended use.

Consistency in product quality is achieved through the implementation of a comprehensive quality management system that:

- Incorporates GMP and GLP
- Complies with Regulatory requirements
- Complies with the requirements of Algorithm licensors
- Complies with the requirements of ISO 9001
- Is continuously monitored for correct implementation and effectiveness

Algorithm aims at having the required products **available on time** by:

- Ensuring adequate control and timely provision of raw materials
- Maintaining adequate, sufficient and reliable process equipment and facilities
- Minimizing rejects

In order to enhance stakeholder satisfaction, Algorithm is committed to **continual improvement** achievable through the processes that are built in its quality management system.

Life in focus
